EXPERIENCE

LabPlan, Laboratório de Planejamento Energético
Researcher

MAR 2017 - DEC 2018

- Research and development of a methodology for automatic reconfiguration (self-healing) of medium voltage distribution networks applying Multiagent Systems concepts in the management of remote controlled equipment.
- Simulation and implementation of the initial methodology of automatic reconfiguration in Python.

INESC P&D Brasil - LabPlan
Junior Software Developer

JAN 2019 - Sept 2021

- Aid and study of methods for electric power planning.
- Development of automatic network recomposition software in Java.
- Maintenance and improvements of applications in C #.

ACADEMIC EDUCATION

Federal University of Santa Catarina, Florianópolis
Electrical Engineering

AUG 2011 - DEC 2018

One-year exchange program at the National University of Ireland, Galway.
